

I have heard that in your introduction of LPFM that these will take precedent over the present translator stations. I do not think this to be in the interest of communities across America and especially not in Greeley, CO where I receive broadcast from a translator station of K-Love which serves thousands of thousands of our residence. K-Love offer to our community a service that other stations do not offer and to have it taken off the air for a LPFM to take it places is totally unacceptable. Instead if you are introducing a new service then you need to find another way to offer that service to the new LPFM other than robbing those traslastor stations for your cause. The translator stations of K-Love offer to people a public service that is invaluable to us. Thank you for your consideration of a person who the FCC is called to serve and listen to.
